The building aims to utilize the area's heritage historical patterns and proportions, but with modern and efficient technology and building systems. It's an innovative six-storey, 165,000-square-foot office tower above prime retail and commercial space, and a 445-car parkade, including 245 public parking spaces.
 - 351 has been registered with the Canada Green Building Council LEED® (Leadership in Energy & Environmental Design) certification program and has been designed to achieve the LEED® Gold certification standard. LEED® is an internationally recognized green building certification system that promotes sustainable building and development practices.
